

Removal of Occupant-use Hose Lines

Effective Date: **01/01/2017**

California Fire Code Section 901.8.2 - Removal of existing occupant-use hose lines. The fire code official is authorized to permit the removal of existing occupant-use hose lines where all of the following conditions exist:

1. Installation is not required by this code or the California Building Code.
2. The hose line would not be utilized by trained personnel or the fire department.
3. The remaining outlets are compatible with local fire department fittings.

Should a building owner wish to remove the occupant-use hose lines, a Fire Suppression permit may be submitted (sample attached) along with floor plans indicating the hose locations proposed to be removed. The Cover sheet of the drawing(s) shall indicate the:

- All Names, Addresses & Contact Information pertinent to the job.
- A description of the modifications proposed.
- Justification for the proposed changes.
 - Installation is not required by this code or the California Building Code.
 - The hose line would not be utilized by trained personnel or the fire department.
 - The remaining outlets are compatible with local fire department fittings.

Upon removal of hose, the Standpipe system shall be inspected, tested and maintained by a qualified State of California Contractor State License Board Licensed Fire Protection Contractor in accordance with Section 4.1.1.2 of NFPA 25 Standard for the inspection, Testing and Maintenance of Water Based Fire Protection Systems 2013 California edition (Based on NFPA 25, 2011 edition).

The Labels, Tags and Forms as required by California NFPA 25 Section §906 and Chapter 6 shall be completed, available for review, and/or in place for SJFD final inspection to complete the permit.

Important Note:

- All components for every fire alarm and fire detection system shall be California State Fire Marshal listed and approved for the purpose for which they are installed.
- All components of every fire extinguishing system shall be UL or FM listed.
- Prior to the installation of any fire protection system in the City of San Jose, plans must be approved by the Fire Marshal and final inspection approving the system must be made before the system may be placed into service.
- This permit application or approved permit will expire after 180 days of inactivity.
- All fees as a result of this permit are the responsibility of the installing contractor.
- Call this office at least 72 hours in advance to schedule an inspection.

I declare under the penalty of perjury, under the laws of the State of California, that the foregoing is true and correct and that, to the best of my knowledge, the license(s) listed above are those required for the work to be performed and are in full force and effect, or if exempt, that the exemptions meet the requirements of the Contractor's State License Law as contained in the Business and Professions Code, Division 3, Chapter 9. If there is any change which would materially affect the above information, I will notify the Bureau of Fire Prevention.
